

GIAN CARLO A. NAJITO

Fullstack Developer

855 Bohol St. Sampaloc, Manila, Philippines | +63 935 114 3716 | giancarlonajito@gmail.com

PROFESSIONAL SUMMARY

Fullstack Developer with 6 years of professional experience specializing in JavaScript-based technologies across web and mobile platforms. Expert in building scalable, high-performance applications using React, React Native, Node.js, and NestJS. Strong background in modernizing legacy systems, designing RESTful and real-time APIs, and deploying cloud-ready solutions on AWS. Highly adaptable engineer with a strong willingness to learn new programming languages and technologies as project and business needs evolve.

CORE TECHNICAL SKILLS

- Primary Language: JavaScript (ES6+), TypeScript
- Frontend: React.js, React Native, Vue.js,
- Backend: Node.js, NestJS, Express, .NET (integration & legacy support)
- Databases: PostgreSQL, MongoDB, MySQL
- Architecture: RESTful APIs, WebSockets, Microservices
- DevOps & Tools: Docker, AWS EC2, Git, CI/CD fundamentals
- Additional Languages (Applied / Learning): C#, Python, Java, SQL

PROFESSIONAL EXPERIENCE

Fullstack Developer – Pragmateam | Nov 2025 – Present

- Develop the Ask A Vet app for a real-time pet health monitoring platform integrating mobile applications and hardware trackers.
- Built scalable backend services using NestJS and PostgreSQL, with React Native for cross-platform mobile applications.
- Containerized applications using Docker and managed deployments to support reliable, highly available systems.

Fullstack Developer – Samsung R&D; Institute | Sep 2022 – Nov 2025

- Maintained and enhanced enterprise resource management systems using the MERN stack.
- Contributed to backend infrastructure design, optimization, and performance tuning.
- Collaborated with cross-functional teams to enforce clean, maintainable JavaScript standards.

Web Developer – Accenture Inc. | May 2021 – Sep 2022

- Developed enterprise web applications using React.js, C#, and SQL integrated with a global enterprise social platform.
- Modernized Clinic Management Systems using Vue.js, Node.js, and MongoDB.

- Implemented secure data synchronization between legacy .NET systems and JavaScript-based platforms.

Application Engineer – Medicard Philippines | Jul 2020 – Apr 2021

- Provided production support and maintenance for the Clinic Management System (CMS) legacy application.
- Developed new CMS features using Vue.js, Node.js, and MongoDB.
- Implemented data integration solutions to synchronize data between legacy .NET CMS and modern applications, ensuring consistency and reliability.

Web Developer – Medicom Pacific Inc. | Nov 2019 – Jun 2020

- Modernization and maintenance of the Medicom CRS legacy application.
- Rebuilt system components using Laravel, Vue.js, and MySQL, improving performance and user experience.

EDUCATION & TRAINING

Bachelor of Science in Information Technology – The National Teachers College

Fullstack Web Development Bootcamp – Zuiitt Coding Bootcamp

LANGUAGES

English: Professional Working Proficiency

Filipino: Native
